PERSONAL PROFILE

I am a technician with a mechanical background and advanced developing knowledge and a wide custumer service experience, ready to start learning new things in the tech field.

EXPERIENCE

I was responsible for a vending machine, my job was to make a costumer friendly interphase using Screens, sensors, and of course, the whole coding part.

using Java, I was able to develop a basic TicketMaster App, using a UI, as well as a Food processor using only C++

In my latest job I was responsible for the frontEnd and BackEnd development for a financial consulting web page
